Warranty None. Use at own risk. For entertainment purposes only
Author
Initial Stephen George (Original idea and creation)

Introduction

You order the parts and vitamins in the sourcing guide and while you are waiting you print the plastic parts, all 185 of them. The vitamins arrive and now you have to work out what goes where. Or you use this guide to print the parts as you need them, possibly the night before.

Print parameters (More details on page 4 of Trident manual)

Material ABS, Infill gyroid, Infill 40% Layer_height 0.2mm, Wall_count 4, Nozzle 4mm, Top/bottom layers 5

The Rules

The first time a picture of the part is shown in the instructions it should be added to the list. After that it's ignored as you should have already printed it.

The Machine the parts are for

Building Formbot kit, 250 x 250, Direct feed, Dragon High Flow, 3 hole cable chain.

Keeping track

The Printed ☐ tick box in the page number box is for your use.

It allows you to print out this pdf (without this header page) and tick off the parts as they come off the printer. Hopefully you won't double print when you don't want to.

Future Improvements to this doc

- 1) Different colour scheme for accent pictures
- 2) Removal of background of pictures
- 3) Time of print using a Prusa mini as a guide

Any other ideas please visit old.reddit.com/r/VORONDesign

Source files

https://github.com/LesserSpottedAustralianSquirrel/voron_trident_pic

This include this .pdf and the source files

Notes

This is fan base documentation. The official document take precedence in any conflict of information or technical detail.

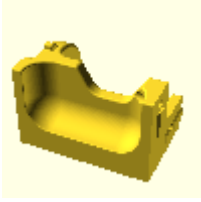

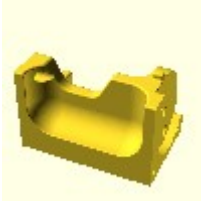

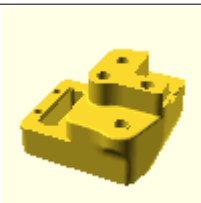

Silly quote

May your Voron print head always fly "straight and true" and never get tired and go to bed.

Picture	Directory	Name in directory (.stl)	Name in manual	Page number Have you printed it	Accent_part / Notes

Done!

I have one question for you.
Did you print the tool on page 58 in the accent colour?

- ☐ Yes, because it's cool
- ☐ No, Mr George, Because I am on to you
